

LAXIT KHANPARA

Software Engineer

laxitkhanpara3646@gmail.com • +91 82386 94033 • linkedin.com/in/laxit-khanpara • github.com/laxitkhanpara

PROFESSIONAL SUMMARY

Self-driven, solution-oriented **Software Developer** with 3+ years of experience designing, architecting, and delivering high-throughput, low-latency enterprise applications. Proven track record of taking **end-to-end product ownership** on a live **B2B CPaaS platform**, driving technical architecture decisions, and optimizing system performance for high-frequency data processing. Recognized for scaling developer velocity by **pioneering AI-assisted development tools and workflows** across engineering divisions. Exceptional leader adept at **mentoring cross-functional teams**, **training interns**, managing stakeholder expectations, and executing delivery within strict Agile/Scrum guardrails.

TECHNICAL SKILLS

Languages & Frameworks: Java 17/21, JavaScript (ES6+), Spring Boot, Spring MVC, Hibernate, JPA, React.js, Angular, Node.js, Express, REST API, Multithreading, Concurrency Tuning, Design Patterns

Cloud, DevOps & Messaging: AWS (EC2, S3, Session Manager), Docker, Kubernetes, CI/CD Pipelines, Apache Kafka, Webhooks, Meta API, Google RCS API

Databases & Tools: MySQL, PostgreSQL, MongoDB, Git, Postman, Gradle, Maven, Liferay DXP, JIRA, Confluence

Leadership & Practices: System Architecture, Technical Mentorship, Generative AI Development Workflows, Sprint Planning & Estimation, Code Reviews, SOLID Principles

WORK EXPERIENCE

Aixtor Technology | Java Developer

Dec 2024 – Present

Java 17/21, Spring Boot, Kafka, Hibernate, JPA, MySQL, AWS, React.js, Liferay DXP

- **System Optimization:** Architected an **AI voice agent call scheduling algorithm** via concurrent execution pools and back-off retry logic, optimizing batch completion speeds by **~10x**.
- **High-Volume Core Systems:** Designed and scaled a **real-time omnichannel campaign messaging engine** using Apache Kafka, Meta Business API, and Google RCS API to handle high-frequency, large-scale asynchronous data pipelines.
- **Process Innovation:** Engineered an automated sequential module deployment engine, slashing release cycles and **reducing development deployment overhead by 95%**.
- **AI-Driven Velocity:** Spearheaded and delivered technical training sessions for the engineering team on integrating **Generative AI tools into development workflows**, accelerating features development cycle times by **30%**.
- **Talent Incubation:** Managed, structured, and executed the **onboarding and internship training program**; directly mentored 3+ interns and junior engineers on Core Java, multi-threading, and distributed enterprise architectures.
- **Team & Tech Leadership:** Championed high-quality engineering standards; led architectural designs, code reviews, and managed end-to-end sprint deliverables using JIRA in a fast-paced Scrum environment.

CSCoDeTech | Full Stack Developer

Apr 2023 – Sep 2024

Java, Spring Boot, Hibernate, JPA, MySQL, React.js, REST APIs, System Design

- Gained real-world exposure to how enterprise applications are architected and delivered in production environments, working alongside senior engineers to understand end-to-end development lifecycles, system design decisions, and secure access patterns.
- Engaged with the team to collaboratively design and develop full-stack RESTful APIs in Spring Boot paired with React.js UIs, contributing to both backend and frontend layers across **10+ application modules** through active participation in team-driven development cycles.

PROJECTS

ESM Platform (*Spring Boot, React, PostgreSQL, Spring Security, Spring Workflow, REST APIs, LLM Integration, Docker*) Feb – Present

- Architected a **multi-role Employee Self-Service portal** using **Spring Boot**, delivering **role-specific experiences** from a **single shared React frontend**, with access controlled entirely through **per-role JWT claims and Spring Security RBAC**—eliminating code duplication.
- Built a **Ticket Management System** and **Leave Management System** with approval workflows orchestrated via a **Spring Boot Workflow Service**, supporting configurable multi-level routing based on role hierarchy.
- Integrated an **LLM** to power **AI-driven reporting and analytics dashboards**—generating natural-language summaries and visual insights (charts, trend analysis) from structured HR data for management decision-making.

CPaaS Service Portal (*Spring Boot, React, PostgreSQL, Spring Security, OAuth2, Kafka, Docker, AWS EC2, Azure DevOps*) Sep 2025 – Feb 2026

- Built a centralized **enterprise B2B communication portal** using **Spring Boot microservices** supporting WhatsApp and Google RCS channels, enabling template management, campaign execution, and end-to-end messaging workflows.
- Developed the portal UI with **React**, integrating the **Meta WhatsApp Business API** and **Google RCS API**; routed inbound webhook responses through **Apache Kafka** for reliable, low-latency async processing.

Voice AI Automated Calling Platform (*Liferay, Spring Boot, Java Multithreading, Spring Scheduler, Docker, Kubernetes, AWS*) Mar – Aug 2025

- Engineered a **bulk outbound calling microservice** using **Spring Boot with a configurable multi-threaded execution pool (ExecutorService)**, significantly reducing campaign dispatch time compared to sequential execution for large batches.
- Deployed the platform using an **orchestrated container architecture (Docker + Kubernetes) on AWS**, ensuring high availability and horizontal scalability for concurrent calling campaigns.

VastraRent (*Spring Boot, PostgreSQL, Docker, OAuth2*) Aug – Sep 2024

- Built a production-grade **clothing rental platform API** with an optimised PostgreSQL schema, OAuth2 JWT authentication, RBAC, and Docker containerisation. [GitHub](#)

Limbd University Management System (*React, Node.js, Express.js, MySQL, MongoDB*) Sep – Oct 2024

- Delivered a live freelance **full-stack UMS** with Student, Teacher, and Admin portals: automated grade calculation, attendance tracking, timetable, and PDF marksheet generation.

CERTIFICATIONS & OPEN SOURCE

Certifications

- **Building Enterprise Websites with Java** — LiferaY, Inc.
- **LiferaY Application Developer Certification** — LiferaY, Inc.

Open Source Contributions

- **create-liferaY-react-cx** (*Java, Node.js, npm, React, LiferaY DXP*) 2026
Published npm CLI (`npx create-liferaY-react-cx`) that scaffolds a production-ready React Client Extension for LiferaY DXP in a single command, eliminating repetitive boilerplate setup. **Featured on the official LiferaY Developer Blog.** [npm](#) · [GitHub](#) · [Blog](#)
- **create-liferaY-microservice-cx** (*Java, Node.js, npm, OAuth2, LiferaY DXP*) 2026
Published npm CLI to scaffold OAuth2-secured microservice Client Extensions, enabling developers to define fine-grained scopes and access protected LiferaY APIs from frontend applications out of the box. [npm](#)

ACHIEVEMENTS & HACKATHONS

- **1st Place** — **Vadodara Hackathon 4.0** (Sep 2023, 200+ teams): Managed and led the team to build *Guru Zone*, a personalized AI educational system utilizing Spring Boot and MySQL over an intense 7-day sprint.
- **3rd Place** — **PUCODE Hackathon** (Mar 2024): Built *CampusWay*, an AR indoor navigation app using Unity and Mapbox in 15 days.

EDUCATION

B.Tech — Information Technology

2021 – 2025

CGPA: 8.39 / 10.0

Parul Institute of Engineering and Technology, Vadodara, Gujarat
